

2nd CISEPS Workshop**Social Science and Neuroscience:
How Can They Inform Each Other?**

December 17, 2010
University of Milano-Bicocca
Building U7, 4th floor, Aula Consiglio di Facoltà

Social and biological approaches to human behaviour have traditionally been characterized by mutual distrust. This workshop will bring together scientists from different disciplines to discuss recent developments in the relationship between social science and neuroscience. The objective is to identify key areas for synergies and the most promising directions for future research.

PROGRAMME

08:45 Registration

09:15 Opening address: Luca Stanca, Patrizio Tirelli, Pierluigi Porta

MORNING SESSION – Chair: Luca Stanca, University of Milano-Bicocca and Director of CISEPS

09:30 **David K. Levine**, Washington University in St. Louis
Neuroeconomics?

10:10 **Rosemarie Nagel**, Universitat Pompeu Fabra
Assessing strategy risk and reasoning with fMRI

10:50 Coffee break

11:10 **Jack Vromen**, Erasmus University
Neuroeconomics after the first wave of excitement ebbed away

11:50 Open discussion

12:30 Lunch

AFTERNOON SESSION – Chair: Paolo Cherubini, CISEPS, Univ. of Milano-Bicocca

14:10 **Carlo Umiltà**, University of Padua
Social Science and Neuroscience cannot inform each other by skipping Psychology

14:50 **Alessandro Antonietti**, Cattolica University
How Is It Possible to Integrate Neuroscientific Contributions in Social Sciences?

15:30 Open discussion

16:00 Conclusion

16:15 Coffee

Organizing Committee:

Stefania Ottone, CISEPS & EconomEtica, University of Milano-Bicocca

Fabrizio Panebianco, CISEPS, University of Milano-Bicocca

Fabio Tufano, CISEPS, University of Milano-Bicocca
